Supplemental disclosure (Note 13)

Notes to the Condensed Consolidated Interim Financial Statements For the three-month and nine-month periods ended September 30, 2020 and 2019 (Unaudited, expressed in Canadian Dollars)

1. Nature of activities and going concern

Osisko Metals Incorporated ("Osisko Metals") and its subsidiaries (collectively, the "Company") specialize in the exploration and evaluation of base metals properties located in Canada. The address of the Company's registered office and its principal place of business is 1100, avenue des Canadiens-de-Montréal, Suite 300, Montréal, Québec, Canada.

The Company was incorporated under the provisions of the *Business Corporations Act* (Alberta) on May 10, 2000. Since May 2017, the Company is registered under the *Business Corporation Act* (British Columbia).

The Company's shares are listed under the symbol "OM" on the TSX Venture Exchange ("TSX-V"), under the symbol "OB5" on the Frankfurt Stock Exchange and under the symbol "OMZNF" on the OTCQX Best Market (the "OTCQX").

Until it is determined that properties contain mineral reserves or resources that can be economically mined, they are classified as exploration and evaluation properties. The recoverability of deferred exploration and evaluation expenses is dependent on the discovery of economically recoverable reserves and resources; securing and maintaining title and beneficial interest in the properties; the ability to obtain necessary financing to continue the exploration, evaluation and development of its properties; and obtaining certain government approvals or proceeds from the disposal of properties. Changes in future conditions could require material impairment of the carrying value of the deferred exploration and evaluation expenses. Although the Company has taken steps to verify title to its mining properties on which it is currently conducting exploration and evaluation work, in accordance with industry standards for the current stage of exploration and evaluation of such properties, these procedures do not guarantee the Company's title. Property title may be subject to unregistered prior agreements and non-compliance with regulatory requirements.

These unaudited condensed consolidated interim financial statements have been prepared on the basis of accounting principles applicable to a going concern, which contemplates the realization of assets and settlement of liabilities in the normal course of business as they come due. In assessing whether the going concern assumption is appropriate, Management of the Company ("Management") takes into account all available information about the future, which is at least, but not limited to twelve months from the end of the reporting period. As at September 30, 2020, the Company had negative working capital of \$1,411,981 (including a cash balance of \$1,179,784), an accumulated deficit of \$35,528,853 and had incurred a loss of \$5,250,776 for the nine-month period ended September 30, 2020. As the Company is in the exploration and evaluation stage for its projects, it has not recorded any revenues from operations and has no source of operating cash flow.

The working capital as at September 30, 2020 will not be sufficient to meet the Company's obligations, commitments and budgeted expenditures through September 30, 2021. Management is aware, in making its assessment, of material uncertainties related to events and conditions that may cast a significant doubt upon the Company's ability to continue as a going concern as described in the preceding paragraph, and accordingly, the appropriateness of the use of accounting principles applicable to a going concern. These unaudited condensed consolidated interim financial statements do not reflect the adjustments to the carrying values of assets and liabilities, expenses and balance sheet classifications that would be necessary if the going concern assumption was not appropriate. These adjustments could be material.

The duration and full financial effect of the COVID-19 pandemic is unknown at this time. Any estimate of the length and severity of these developments is therefore subject to significant uncertainty, and accordingly estimates of the extent to which the COVID-19 may materially and adversely affect the Company's operations, including suppliers, service providers, employees and on global financial markets limiting our ability to access financing are also subject to significant uncertainty. The Company is monitoring developments in order to be in a position to take appropriate action.

The Company's ability to continue future operations and fund its planned exploration activities at its projects is dependent on Management's ability to secure additional financing in the future. Any funding shortfall may be met in the future in a number of ways, including, but not limited to, selling a royalty on its projects (see Note 5) and the issuance of debt or equity instruments. While Management has been successful in securing financing in the past (see Notes 5 and 7), there can be no assurance that it will be able to do so in the future or that these sources of funding or initiatives will be available to the Company or that they will be available on terms which are acceptable to the Company. If Management is unable to obtain new funding, the Company may be unable to continue its operations, and amounts realized for assets might be less than the amounts reflected in these condensed consolidated interim financial statements.

3. Judgments, estimates and assumptions

The preparation of financial statements requires the Company's management to make judgments, estimates and assumptions on reported amounts of assets and liabilities, and reported amounts of expenses. The estimates and assumptions are based on historical experience and various other factors that are believed to be reasonable under the circumstances, the results of which form the basis of making the judgments about carrying values of assets and liabilities that are not readily apparent from other sources. Actual results may be substantially different. The critical accounting, judgments, estimates and assumptions are the same as those in our most recent audited annual financial statements.

Share-based compensation for the three-month period ended September 30, 2020 amounted to \$199,568 (\$214,301 for the three-month period ended September 30, 2019) of which \$9,872 was reversed from exploration and evaluation assets (\$12,088 capitalized for the three-month period ended September 30, 2019).

The share options, when granted, are accounted for at their fair value determined by the Black-Scholes option pricing model based on the vesting period and on the following weighted average assumptions for the nine-month period ended September 30, 2020:

Share price at date of grant	\$0.40
Exercise price at date of grant	\$0.40
Risk-free interest rate	0.26%
Expected life of options	1.0 year
Annualized expected volatility	55%
Dividend rate	0%
Weighted average fair value per option	\$0.09

The expected volatility was determined by calculating the "historical" volatility of the Company's common share price back from the date of the grant and for a period corresponding to the expected life of the share options. When computing historical volatility, Management may disregard an identifiable period of time in which it considers that the share price was extraordinarily volatile because of a specific event that is not expected to recur during the expected life of the share option.

12. Fair value of financial instruments

Financial instruments measured at fair value

The following presents financial assets and liabilities measured at fair value in the statement of financial position in accordance with the fair value hierarchy.

This hierarchy groups financial assets and liabilities into three levels based on the significance of inputs used in measuring the fair value of financial assets and liabilities. The fair value hierarchy has the following levels:

- Level 1: quoted prices (unadjusted) in active markets for identical assets or liabilities at the reporting date;
- Level 2: inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly or indirectly; and
- Level 3: inputs for assets or liabilities that are not based on observable data (unobservable inputs).

The fair value of the investments in shares have been estimated by reference to their quoted prices at the reporting date. Investments measured at fair value in the statement of financial position as at September 30, 2020 and December 31, 2019 are classified in level 1.

Option Agreement

In October 2020, the Company closed an option agreement (the "Option Agreement") whereby Brunswick Exploration Inc., (formerly Komet Resources Inc.) ("Brunswick") can acquire a majority interest in Osisko Metals' Brunswick Belt exploration property (the "Property"), located in the eastern portion of the Bathurst Mining Camp in the Bathurst area in New Brunswick, including the Key Anacon and Gilmour South properties. The Option Agreement allows Brunswick to earn up to 75% interest by spending an aggregate of \$15,000,000 in three stages over a seven-year period.

The Option Agreement has three distinct earn-in requirements:

• The First Option: by funding an aggregate of \$1,000,000 on or before the first-year anniversary of the signing of the Option Agreement and completing a cash payment of \$100,000, Brunswick can earn an initial 25% interest in the Property.

• The Second Option: by funding an aggregate of \$10,000,000 (inclusive of First Option expenditures) according to the schedule below, Brunswick can earn an additional 26% interest in the Property for a total interest of 51%:

- An aggregate of \$2,000,000, on or before the 2nd year anniversary;
- An aggregate of \$4,000,000, on or before the 3rd year anniversary;
- An aggregate of \$6,500,000, on or before the 4th year anniversary; and
- An aggregate of \$10,000,000, on or before the 5th year anniversary.

• The Third Option: by funding an additional aggregate of \$5,000,000 and completing an Economic Study according to the schedule below, Brunswick can earn a further 24% interest in the Property for a total interest of 75%:

- An aggregate of \$2,500,000, on or before the 6th year anniversary;
- An aggregate of \$5,000,000, on or before the 7th year anniversary; and
- Complete an Economic Study on or before the 7th year anniversary.

Once any one of the three earn-in requirements are met (as per Brunswick's discretion), a joint venture can be formed between Brunswick and Osisko Metals.
