Community contribution and sponsorship program

Osisko Metals seeks to be a trusted partner and member of the community where the Gaspé Copper project will be developed. We want to make a difference by supporting local organizations through financial participation in activities or fundraisers that are in line with our values.

If you would like Osisko Metals to support you, you can send us your request at any time.

Eligibility criteria

The areas of intervention we support may vary, but projects or activities must contribute to improving the quality of life in the community and have a real and lasting impact on it. Please note that each application will be evaluated according to the following criteria:

- 1 Relevance and alignment of objectives:** The request must be in line with the company's **values**. It must be aligned with the company's corporate social responsibility objectives or field of activity.
- 2 Community impact and sustainability:** The event or project must have a positive and lasting impact on the local community.
- 3 Within budget:** The request must be in line with the company's sponsorship budget, which is designed to allow us to support more than one well-targeted project.
- 4 Visibility and networking opportunities:** The event or project supported must be able to provide media or community visibility for the company. As the company seeks to reach out to the community, any networking or partnership development opportunities offered by the event or project will be considered.

Procedure

Fill out the **[request form directly on our website](#)**, via the Community or Contact page. Be clear and explicit, and attach all necessary elements (visibility plan, etc.). You can send us additional documents at murdochville@osiskometals.com.

Rest assured that we will get back to you as soon as possible.

Please note that Osisko Metals reserves the right not to fund projects that do not correspond to its values and criteria.
