

**Osisko Metals is a Canadian copper exploration and development company focused on redeveloping past-producing mines in a tier-one mining jurisdiction with a clear permitting pathway.**

- Highly successful leadership team with a proven track record
  - Discovered, developed, and sold the world-class Canadian Malartic and Windfall gold deposits, delivering significant shareholder return
- Osisko Metals is fully funded to advance the Gaspé Copper Project through to a construction decision
  - Strategic investors including Agnico Eagle Mines, Caisse de dépôt, Franco-Nevada, Goldfields, and Hudbay Minerals

## GASPÉ COPPER PROJECT

**One of North America's largest undeveloped copper projects with infrastructure in place**

- Located near the town of Murdochville in Québec's Gaspé Peninsula, approximately 825 km east of Montréal
- Gaspé Copper produced more than 141 Mt Cu at 0.9% Cu over 44 years
- Paved highway access to site, and hydroelectric substation and windfarm
- Port access via Gaspé and rail access in southern Gaspésie
- Strong support from the Québec government, a mining-friendly jurisdiction
- Updated mineral resource estimate planned for Q1'26
- 2026 drill program: 50,000m planned to start Q2'26

**A premier, large-scale copper asset with exploration potential**

- Current Copper Mountain in-pit resource at 824 Mt @ 0.34% CuEq (Indicated) and 670 Mt @ 0.39% CuEq (Inferred)
- 4.91 billion pounds of contained copper, significant molybdenum (274 million pounds) and silver (46.0 million ounces), one of the largest undeveloped copper-molybdenum deposits in North America
- Clean copper and molybdenum concentrates with excellent metal recoveries:
  - Copper: 92% to 94%
  - Molybdenum: 65% to 70%
  - Silver: 70% silver recoveries; payable silver credit

### 2026

- ✓ Completed private placement with strategic investors
  - 50,000-metre drill program
  - Start dewatering the historical pit
  - Updated MRE (Q1)
  - PEA (H2)

### 2027-2028

- Feasibility study ('27)
- Environmental and social impact assessment ('28)

### 2029-2031

- Public hearings
- Permit issuance
- Final investment decision
- Project financing and construction

### 2032

**Potential start of production**
