

**SUMMARY OF THE TECHNICAL AND ADVISORY COMMITTEE  
MEETING ON THE DEWATERING OF THE COPPER PIT**

*March 26, 2026*

At the thirteenth meeting of the Technical and Advisory Committee for the dewatering of the Copper Pit, Osisko Metals presented its progress in terms of ministerial requests. A call for tenders has been launched to specify the design of the pumping process. The supporting reports for the ministerial requests are also being drafted.

The research project with INRS (MINO project) is in full swing and implicated researchers are preparing another pre-dewatering baseline campaign for 2026.

Biological inventories for the environmental impact assessment will also continue in 2026.

Finally, the drilling campaign planned for 2026 was presented to the committee members.
